

Tyre Bulletin – 8th May 2022

As you may be aware, JAG Rotax have advised that there are significant supply issues for Mojo tyres, as used for the Mini, Junior and Senior Rotax Classes, and it is not expected to be resolved anytime soon.

JAG Rotax have advised that they're unable to specify a replacement tyre for the Rotax Classes, as most other suppliers they contacted have implied that if Rotax nominated a single brand, e.g. Maxxis or Le Cont, then it would bring a shortage to that brand also. Therefore, it's up to each club to decide what to do and seek exemption from Motorsport UK (MUK).

Following feedback from some drivers, we now have permission from Motorsport UK to run the following sets of tyres at Jersey Kart Club:

Class	Dry Tyres	Wet Tyres
Rotax Mini / Junior:	Mojo D2, or Komet K1H, or Komet K2H	Mojo W5, or Komet K1W
Rotax Senior:	Mojo D5, or Komet K1H, or Komet K2H, or Komet K2M	Mojo W5, or Komet K1W

Note, we will need to revisit this at the end of May and in the meantime the Club will send a race-by-race update to MUK on what tyres are being used. If you do encounter any issues trying to obtain the Komet tyres, please let us know – as we may need to find further alternates and have them approved by Motorsport UK.

Thank you.
